

Ts. Dr. Wan Nordiana is a senior lecturer at the Department of Applied Physics, Universiti Kebangsaan Malaysia. She graduated from Universiti Sains Malaysia with a Degree in Medical Radiation and Master's in Medical Physics. She later completed her PhD at RMIT University, Australia with studies on the application of gold nanoparticles for radiation therapy. Her current research interests are in radiobiology, radiotherapy, radiation dosimetry, radiation protection and nanomedicine. Currently, she teaches nuclear science undergraduate on medical physics topics as well as supervised postgraduate students' research dissertation. Apart from radiobiology and radiotherapy, she also highly interested in multidisciplinary research field such as advanced materials, precision medicine and artificial intelligence.
