

Short description

Dr. Noorazrul Yahya, an Associate Professor at Universiti Kebangsaan Malaysia (UKM), holds a Ph.D. from the University of Western Australia focusing on radiotherapy outcome prediction. He completed postdoctoral research at OncoRay in Dresden, Germany in the same field with the prestigious Alexander von Humboldt fellowship. Continuing to advance expertise, Dr. Noorazrul recently pursued a research attachment in radiomics analysis at UBO (Université de Bretagne Occidentale) in France supported by funding from the Embassy of France. He aims to leverage on radiomics to enhance prediction models and subsequently improves radiotherapy outcomes.
